Selected Projects

To-Do List App | MongoDB, Express.js, React.js, Node.js

- Developed a full-stack task management application using the MERN stack to **create, update, and delete** daily tasks.
- Built RESTful **APIs** with **Node.js** and **Express.js** and integrated them with a React-based frontend.
- Implemented **MongoDB** for **storing** and managing user task data efficiently.

Weather App | HTML5, CSS3, JavaScript, REST API

- Built a responsive weather application using **JavaScript with real-time API integration**.

- **Fetch**ed and **displayed live weather data** including temperature, location, and conditions.
- Designed a clean and user-friendly UI with proper error handling for invalid inputs.

School Management System | React.js,

- Developed a React-based application to manage student data using component-based architecture.
- Implemented **Contact Form functionality** for user input handling and validation.
- Built **Course Enrollment feature** using React Hooks (**useState**) for state management.
- Integrated API to fetch and display external data for dynamic content rendering.
- Ensured responsive UI for smooth user experience across devices.

Education

Intermediate - Computer Science	UK Level 3 Diploma 2024 - 2026
Matric - Computer Science	BISE Lahore 2022 - 2024

Additional Strengths

Problem solving, adaptability and willingness to learn, team collaboration, communication, time management, responsibility.
